# A Preventive Health Program for Infants, Children & Teens

*The Child Health and Disability Prevention (CHDP) Program is a health promotion and disease prevention program serving California's infants, children and teens.*

## California's CHDP Program

The Child Health and Disability Prevention (CHDP) Program is a health promotion and disease prevention program serving California's infants, children and teens.

Children eligible for CHDP services are from low-income families. CHDP makes periodic preventive health assessments available to eligible children who appear well and for children with existing health problems. Funding for the preventive health assessments is provided through the Medi-Cal Program for children enrolled in fee-for-service Medi-Cal and the State CHDP Program for other eligible children.

To ensure that eligible children receive health services, CHDP works with:

- private physicians
- health departments
- managed care plans
- nonprofit health agencies
- nurse practitioners
- nutritionists
- health educators
- dentists
- community clinics
- schools
- Head Start
- WIC
- social/community service agencies

The CHDP Program is responsible for the development of standards and guidelines for the provision of preventive health services to eligible children in California. The CHDP Program is responsible for meeting the federal Early and Periodic, Screening, Diagnosis and Treatment (EPSDT) requirements for Medi-Cal children not enrolled in a Medi-Cal managed care plan.

Children identified with suspected problems after a health assessment are referred for necessary diagnosis and treatment. Many problems can be prevented, corrected, or reduced in severity by prompt diagnosis and treatment.

## Persons Eligible for CHDP Health Assessments

### Medi-Cal Eligible Infants, Children and Teens

#### *Eligibility for Health Assessments*

Children under age 21 with Medi-Cal may receive periodic preventive health services. Children enrolled in the Medi-Cal Program and receiving their medical care on a fee-for-service basis are eligible for one health assessment during each of the following age periods:

Birth - 1 month	10 - 12 months	4 - 5 years
1 - 2 months	13 - 15 months	6 - 8 years
3 - 4 months	16 - 23 months	9 - 12 years
5 - 6 months	2 years	13 - 16 years
7 - 9 months	3 years	17 - 20 years

#### *Dental Eligibility for Dental Assessments*

Children under age 21 with Medi-Cal may receive preventive dental services.

### Non Medi-Cal Eligible Infants, Children and Teens

CHDP provides periodic preventive health services to non Medi-Cal eligible children from birth to age 19, according to the same schedule as above. Children eligible for these services are in families with incomes at or below levels established annually by the State, and have no source of health care coverage for preventive health care services.

### Head Start/State Preschool

Children enrolled in Head Start and state preschool programs are eligible for periodic health assessments while in these programs (generally between the ages of 3-5 years).

## CHDP Program Services

### Health Assessments

Components of the health assessment include:

- Health and developmental history
- Complete physical examination
- Oral health assessment
- Nutrition assessment
- Immunizations as appropriate for age

- Vision screening
- Hearing screening
- Screening tests for anemia, lead, urine abnormalities, tuberculosis, and other problems as needed
- Health education and anticipatory guidance

At the time of the health assessment, the CHDP provider makes referrals to:

- Women, Infants and Children (WIC) Nutrition Program for children to age 5
- Dentists for preventive or restorative care
- Medical providers as necessary

### Case Coordination

The local CHDP Program will assist families in obtaining diagnostic and treatment services for medical and dental problems identified during the health assessment and dental examination. Providers may call the local CHDP Program and request assistance for their patients.

## First Grade Entry Requirements

By law, all children entering the first grade are required to have either a certificate of a health assessment or a waiver on file at the school in which they enroll. The CHDP Program works with the Department of Education in administering and monitoring the requirement of having a completed health assessment 18 months before or up to 90 days after enrolling in first grade. The CHDP Program assists families to meet the requirement by providing eligible children with health assessments.

## CHDP Program Organization

Every local health department in the State of California has a Child Health and Disability Prevention Program. These local CHDP Programs administer the program on a day-to-day basis. They are responsible for provider recruitment, outreach to families with children, community education, case coordination, and implementation of state and federal regulations pertaining to the CHDP Program. The State Department of Health Services administrative offices for the CHDP Program are located in Sacramento, San Francisco and Los Angeles.
